

CPAWS Manitoba Outdoor Education Program

The CPAWS Manitoba Outdoor Education Program gets kids outside and teaches them to appreciate the wonders of nature through games and activities that spark their curiosity.

Environmental Educator Carly Gray - a certified teacher who has a decade of experience working with children in schools and as a day camp counselor and dance instructor - leads the program.

We've developed fresh, new programs and activities for the 2024-25 school year to help children explore Manitoba's natural environment.

School Workshops

Get your students excited about prairie pollinators, or the boreal forest with these engaging and inquiry-led outdoor education workshops.

The 45-minute workshops are ideally delivered in the school yard or a nearby greenspace but can be held inside during extreme weather.

An action plan and classroom extension materials are provided to help teachers extend the learning beyond the workshop.

Tied to curriculum outcomes for K-8.

After School Program

Students spend 90 minutes playing games and learning about Manitoba's animals, plants, climate, trees, soil and more in their school yards.

The eight-week program incorporates inquiry and exploration-based learning, stations, group games, and crafts for students to take home.

Tied to curriculum outcomes for 2-8.

Field Trips

This 3.5 hour excursion includes instruction on basic wilderness safety, movement games, a guided hike with plant and tree identification, a scavenger hunt, self-guided activities, 30 minutes of free play, and group reflections.

Our Nature Discovery Backpacks - filled with great teaching tools like binoculars, a magnifying glass and field guides - enhance the learning experience.

Each student received a take-home workbook with activities to use alongside the backpacks, during the field trip and beyond.

Field trips are offered in Bird's Hill Provincial Park, Beaudry Provincial Park, La Barriere Park, and Assiniboine Park.

Tied to curriculum outcomes for 2-8.

CPAWS Manitoba Outdoor Education Program

Summer Program

Get kids outside, moving their bodies and exploring nature with our summer programs for daycares and camps.

We offer a variety of different programs tailored to ages ranging from 3-12 which include scavenger hunts, nature mindfulness exercises and games. Each workshop also includes take-home crafts like making snail friends or creating seed pods to plant at home (we bring seeds!).

The fun-filled activities are intended to help kids take notice of nature and engage with Manitoba's trees, birds, bugs, plants and animals in new ways.

Litter Cleanup Challenge

Children learn about the value of public service and protecting the environment with our litter cleanup challenge.

This contest is open to schools, daycares, and school-aged groups (such as sports teams and youth groups) across Manitoba.

The lesson plan is tied to curriculum outcomes for grades K-12 in science, social studies, and phys ed.

Activity Tables

We bring activity stations to festivals and venues like the Assiniboine Park Zoo to engage families who may not otherwise have the opportunity to benefit from our programs.

These place-based activities and crafts are tailored to the spaces we visit. Kids who find us at the zoo's pollinator garden learn about what butterflies like to eat through a scavenger hunt for colours, plants and shapes. Kids who visit us in the polar bear exhibit get to be biologists by observing seal behavior and drawing what orcas eat. Kids who find us at festivals learn about bird habitats and adaptations with our build a bird exercises.

Community Group Workshops

We adapt our popular school programming for community groups like Girl Guides, Scouts and the Fort Garry Women's Resource Centre.

Programs are tailored to the age of participants and are delivered in natural settings like parks.

Classes for Adults & Families

Our Nature Club offers drop-in classes in Crescent Drive Park on topics like nature journaling, forest bathing, tree identification and nature photography.

We also deliver interpretive programming like Beginner Bird Walks in Bunn's Creek and exploring the remnant prairie in Headingley with biologist John Morgan.

Outdoor Education Program By the Numbers

A total of **21,751 students and children** benefited from **1132 CPAWS Manitoba place-based outdoor education workshops, field trips and activities** from May 2021 to March 2024. A further **946 Manitobans** benefitted from **41 Nature Club classes & adult-oriented workshops** while **12,003 people** registered for **57 nature-themed webinars**.

We look forward to helping many more Manitobans connect to nature in the years to come.

Outdoor Education Program Teacher Feedback

School Workshops and Activities

CPAWS Manitoba school workshops were launched in May 2021 to support teachers with remote learning opportunities as schools were shutting down due to pandemic restrictions. We were able to begin providing workshops in schoolyards beginning in October 2021.

Here is some feedback from teachers.

"The kids loved it."

"I think that our students do not get nearly as much outdoor, free play time away from recess at school. This is a great way to have them connect authentically to the outdoors."

"Getting to be outside and explore nature was fantastic. It made them see their surroundings in a different way and they spent recess searching for and identifying bugs!"

"The workshop goes PERFECTLY with grade 4 curriculum of Habitats and Communities. Another huge benefit is that the workshop is offered outside. It's also not often students have the opportunity to have a guest work with them outdoors."

"Excellent description and interactive nature of animals that stay, fly away or hibernate. Students loved looking for prints and they used this knowledge when we went to Birds Hill park the following day."

"We learned something new about trees. Students got a chance to use a magnifying glass, and they had never before."

Outdoor Education Program Feedback from Teachers

More Feedback About School Workshops

“The students loved learning about local Manitoba trees and were so proud to share their own experiences with the presenter. The programs were interactive, encouraged movement and the visuals were age-appropriate and captivated the students' attention.”

“Engaging activities/ games at the students' ability level about Manitoba and outdoors. It was great to see some real excitement about exploring their environment and the world around them.”

“The students loved to move around and be outside.”

“I feel the information was relevant. It was interesting, it allowed for questions, reflections... It allows for children to make informed decisions about their environment.

Feedback About Field Trips

“The CPAWS program was an incredible, and magical experience. We went to Birds Hill Park with two grade 2/3 classrooms. I would do this every month if I could! The CPAWS team was incredible, they are so knowledgeable and really make this experience possible. They are prepared, organized and fun.

*The learning integrated into our adventure at Birds Hill Park has carried forward into our classroom (this being themes of Land acknowledgements, living on the land, animal and plant species, as well as name places and history of the land around us.) Over a month later, students are still talking about our field trip to Birds Hill Park. **For many students, this was their first experience in a forest.** CPAWS made this experience magical and memorable, thank you CPAWS! “*

Environmental After School Program Parent & Student Feedback

CPAWS Manitoba Environmental After School Program

The CPAWS Manitoba Environmental After School Program was launched in May 2022 at three schools in Winnipeg: Montrose School, Ecole Constable Edward Finney and Windsor School. Since then, we've delivered 26 more programs in Winnipeg, Lorette and Selkirk.

Students spend 60 minutes playing games and learning about Manitoba's animals, plants, climate, trees, soil and more in their school yards. The eight-week outdoor program incorporates inquiry and exploration-based learning, stations, group games, and crafts for students to take home.

Here is some feedback from parents:

- *"I was hoping to foster a love of nature in my child. This was absolutely achieved!"*
- *"Great program and hopefully it will be available each year! "*
- *"I feel children need to be well rounded. I was excited to see something not sports driven offered."*
- *" The after school model is so convenient. I was really impressed that the kids were learning skills like water testing, as well."*
- *My daughter has autism. I appreciate Avery helping and supporting about my daughter's condition. Thanks to her thoughtful and inclusive attitude, my whole family are glad for this program.*

What their children enjoyed:

- *"Staying outside in nature, gaming about nature and running on the ground."*
- *"Growing plants and crafts."*
- *"Everything, he loved it."*
- *"She loves it and has been asking if I can enroll her in more CPAWS!"*
- *"Being with friends, learning in nature, open space to play and learn"*
- *"Running games, animals, trees, playing fun games, caring for the earth, being outside, dolphin, nice teachers."*
